DETAILED ACTION

Election/Restrictions

Applicant's election of Group I claims 29-32 and 37-39 without traverse in the reply filed on June 8, 2009 is acknowledged.

Claims 33-36 and 40-57 are withdrawn from consideration.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-32 and 37-39 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 of co-pending application 11/561,609. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-5 of the copending application 11/561,609 teaches an ionic conductor comprising a polymer comprising carbon

clusters (fullerene) having one or more ion releasing group (i.e. sulfonyl imide) and electron attractive functional groups (i.e. CX₂, X=halogen) However, the co-pending application '609 does not specifically disclose the ion-dissociative functional compound represented by the structure Cm-CF₂-Gp2-CF₂-Cm as per instant claim 37.

DesMarteau et al. (Journal of Fluorine Chemistry, 72(1995), 203-208) teaches a polymer material containing bis-sulfonylimide group (-SO2-NH-SO2-) (page 207).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of DesMarteau et al. and co-pending application "609 to obtain the invention as specified in the claim 37, motivated by the fact that the these materials might lead to a high lithium mobility in an ionene dissolved in a suitable polymer electrolyte (page 208).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to YUN QIAN whose telephone number is (571)270-5834. The examiner can normally be reached on Monday-Thursday, 10:00am -4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on 571-272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

Application/Control Number: 10/567,283 Page 4
